Objective

I am a Computer Science Major and Math Minor with Java/C application and Full stack Web Developer experience. I am a U.S citizen and will apply for a security clearance as needed.

Education

James Madison University
Bachelor of Science in
Computer Science
Minor in Mathematics
GPA 3.666
Presidents' List 2016
Deans' List 2017-2019
Graduated Dec 2019

Experience

June 2019 – August 2019
Software Intern • Government Retirement and Benefits INC.
Worked with full time developers to implement new and improved features for the existing platform in an agile environment. I orchestrated the movement from one 3rd party library to another, encrypted all internal database ids on the server side, and wrote several database scripts in production.

August 2017 – December 2019
Lead Teaching Assistant • James Madison University
Experience teaching Computer Science concepts, reviewing and debugging peer code. Proficiency in Java. Point of contact for teaching faculty.

May 2015 – May 2019
Cashier • Giant Food of Maryland

Key Skills

Java
C
GIT
SQL
LINUX
Windows
HTML
CSS
JavaScript

Activities

I worked with a Professor to research the realities of hosting networked machines on the cloud for the purpose of running a class. I presented this work at the 2019 Consortium for Computing Sciences in Colleges Eastern Conference and won best poster. Outside of work I enjoy traveling, reading science fiction, and playing video games.

I participated in the first Study Abroad for the Computer Science department at JMU. We traveled to England and Scotland where we learned about Rigidity Theory. Courses were taught by JMU faculty with guest lecturers in the field.
